

Affiliations and Memberships

As a major provider in the geospatial community, Surdex is committed to keeping abreast of industry evolution, technological advancements, and our clients' needs. We are affiliated with and maintain memberships in many organizations, increasing our knowledge by attending conferences, serving on boards, and providing support.

Management Association for Private Photogrammetric Surveyors (MAPPS)

Surdex is a member of the MAPPS, the only national association of firms in the surveying, spatial data and geographic information systems fields in the United States. MAPPS member firms are engaged in surveying, photogrammetry, satellite and airborne remote sensing, aerial photography, hydrography, aerial and satellite image processing, and GPS and GIS data collection and conversion services.

American Society for Photogrammetry and Remote Sensing (ASPRS)

Surdex is a sustaining member of ASPRS, a scientific association serving over 7,000 professional members around the world. Their mission is to advance knowledge and improve understanding of mapping sciences to promote the responsible applications of photogrammetry, remote sensing, geographic information systems (GIS), and supporting technologies. In addition, eight of Surdex's key employees are ASPRS Certified Photogrammetrists and one is an ASPRS Certified Mapping Scientist – Lidar, having met the criteria established by the Society and demonstrated their experience and knowledge.

Missouri Geographic Information Systems Advisory Council (MGISAC)

MGISAC has several objectives, including providing direction and oversight to the Missouri Spatial Data Information Service (MSDIS), developing and publishing standards, representing the state at national meetings and events, hosting an annual statewide GIS conference, coordinating database development, and providing a forum for the state's GIS community.

Affiliations and Memberships

States Geographic Information Council (NSGIC)

NSGIC is an organization committed to efficient and effective government through the prudent adoption of geospatial information technologies. Members include senior state geographic information system managers and coordinators. Other members include representatives from federal agencies, local governments, the private sector, academia and other professional organizations.

Missouri Mappers Association (MMA)

MMA brings together those persons concerned with property mapping in state and local governments and private industries. The association fosters cooperation in the investigation, study, discussion, and recommendation of improvements in property mapping and land record management, the interchange of ideas and experiences, development of improvements to the practice of property mapping and knowledge through education and training, and supporting legislation beneficial to property mappers and land record management.

Hexagon Geospatial

Surdex has partnered with Hexagon Geospatial to supply and distribute data through the Valtus delivery system. Data supplied by Suredex is accessible through a Spatial Data Access Subscription, an ArcXML and WMS service, allowing for real-time streaming of imagery directly to a user's desktop, as well as through static download from the Spatial Data Store.

Esri Partner Network/ESRI Business Partner

Surdex is a part of the Esri Partner Network, a community of like-minded organizations, a world-class platform on which to develop solutions and services, and a solid partnership for sharing best practices for geospatial data and resources to ensure success.
